Diffusion of experience filling space, starting from a single point.

receipt camera®

Objet · Space · eXperience

The smallest point making up an object fills space and spreads out across your diverse experiences. The three keywords that constitute the Receipt Camera® machine are metaphors for infinite diffusivity. It fills, spreads, and sustains through small encounters that start from a single point.
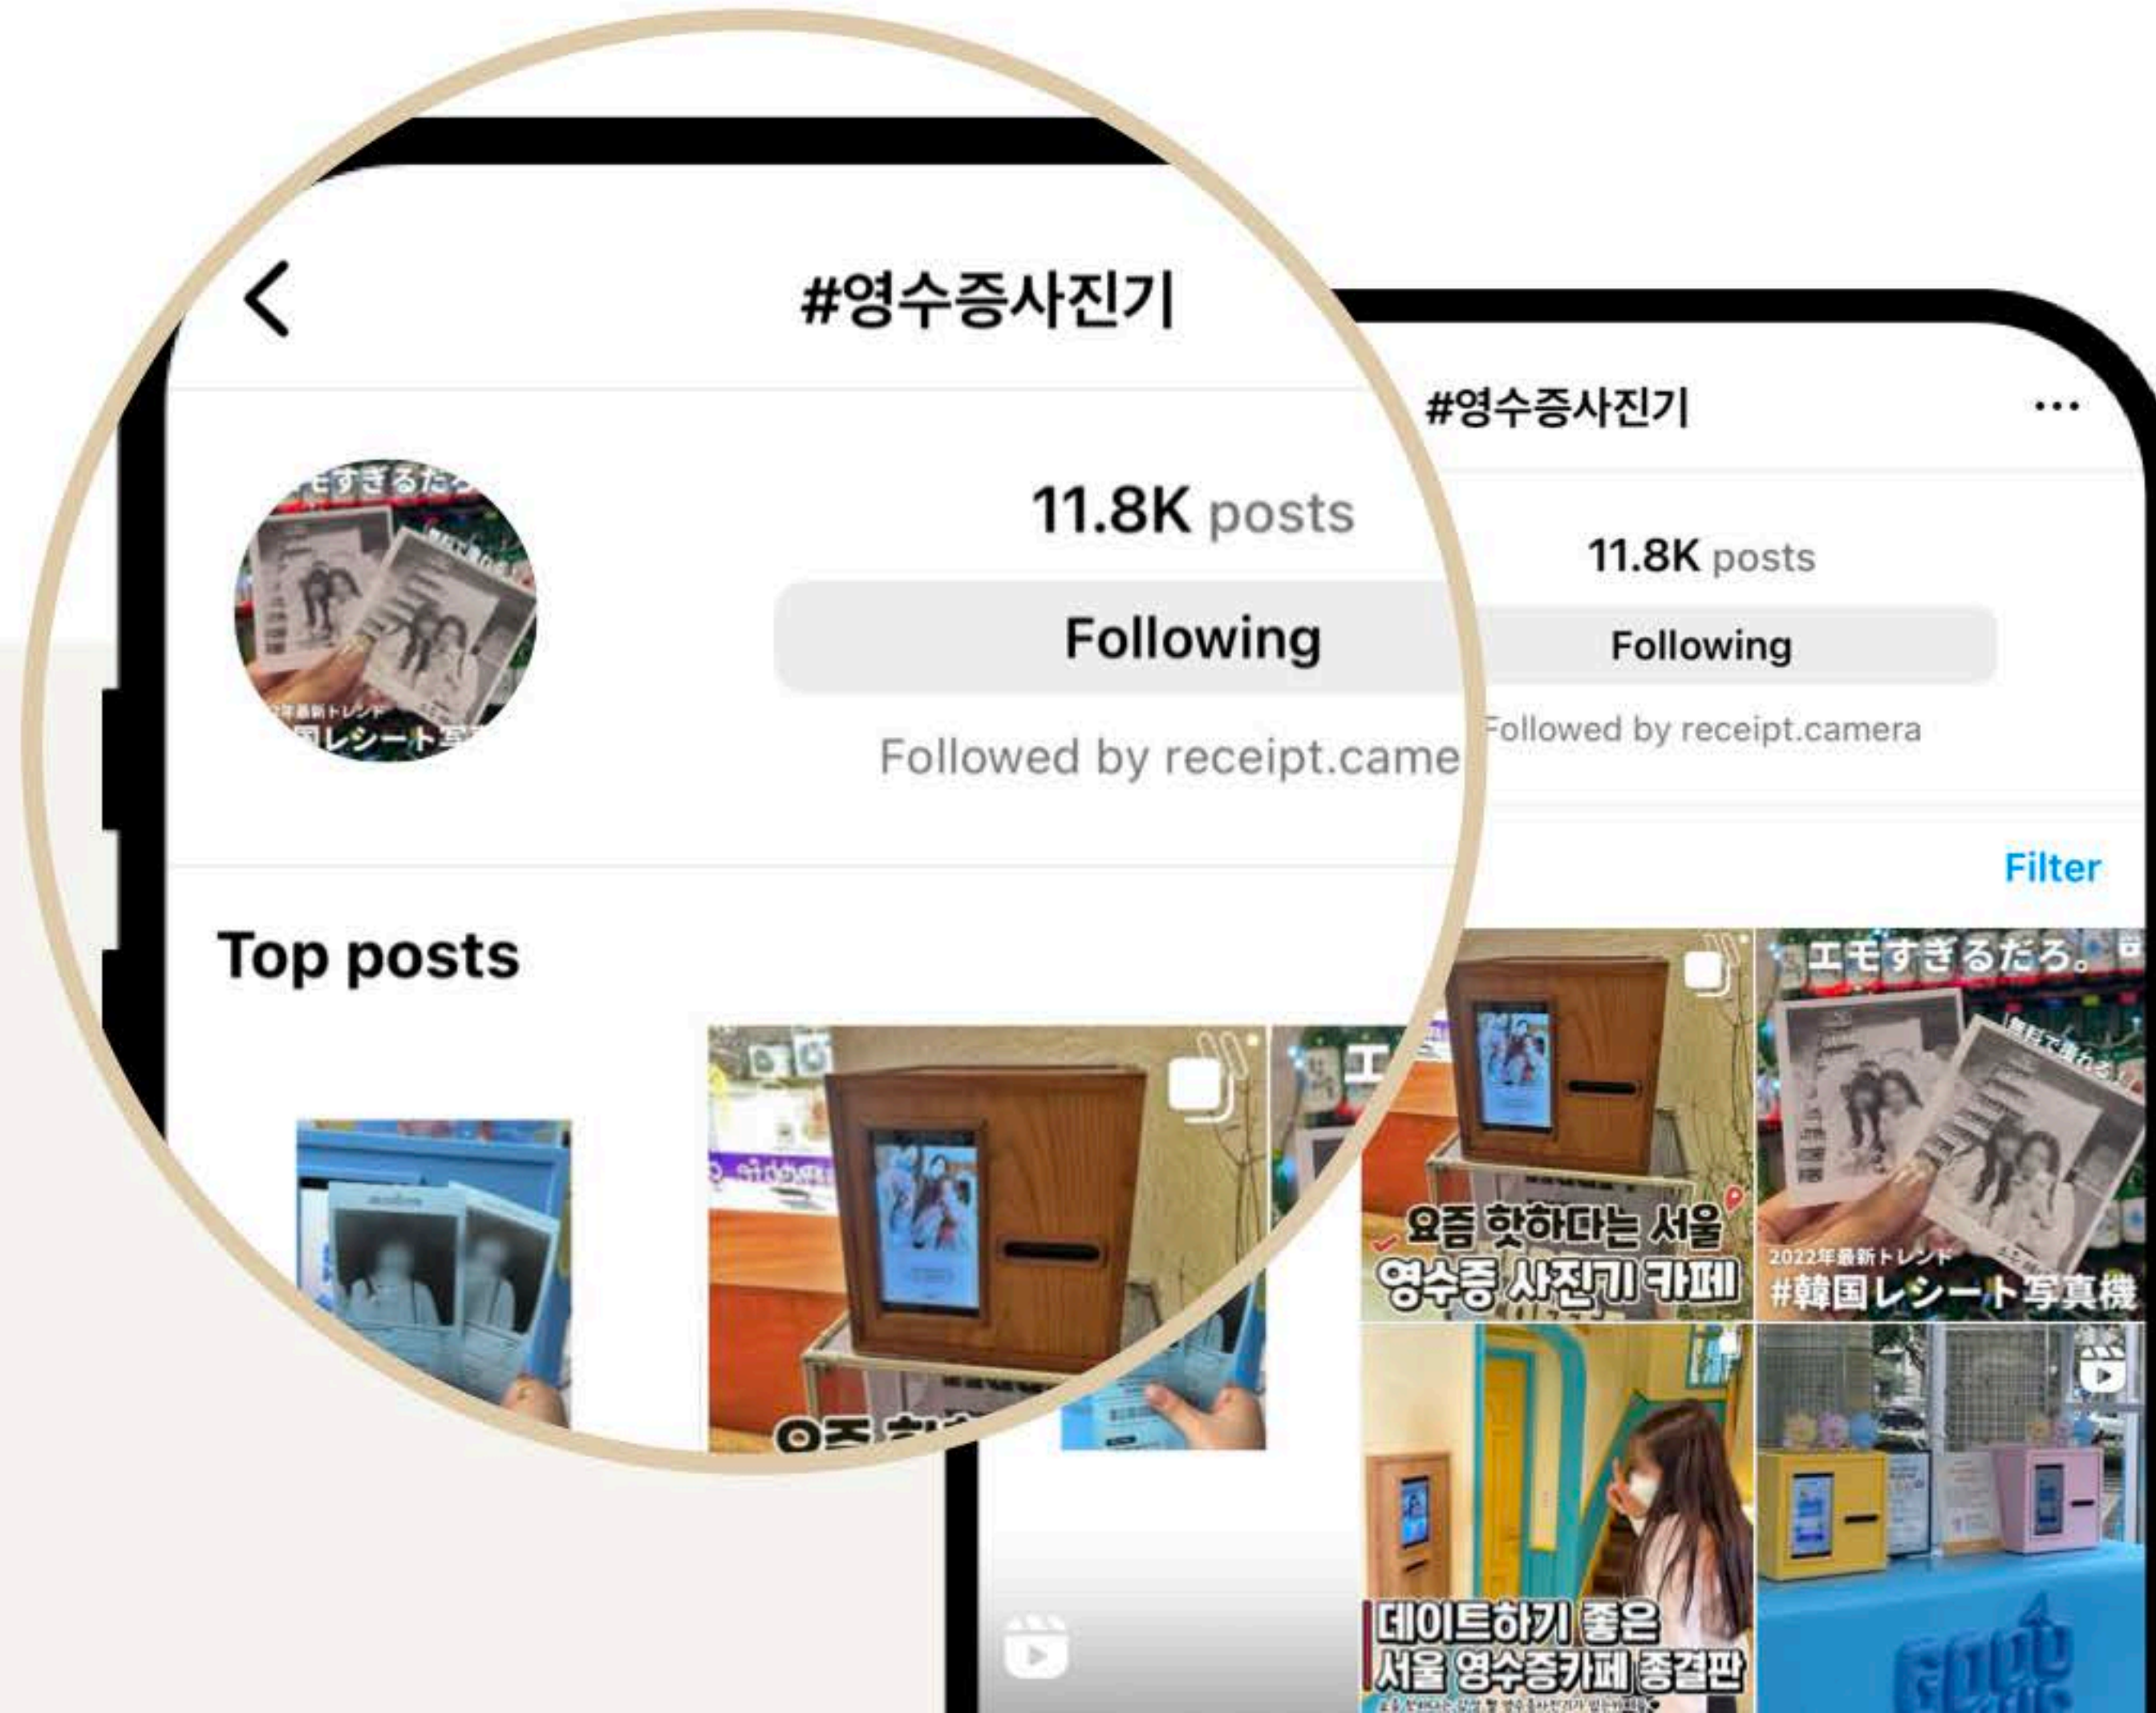

— Brief Company —

Your record, new discovery

Vivid user experiences of the most widely used and irreplaceable Brief Receipt Camera® can be checked through various social media platforms.

Easily customizable,
your own custom branding

The Receipt Camera® offers powerful customization features.
By leveraging various functions supported by dedicated software,
it can be utilized as a marketing tool tailored to my brand,
encouraging customer engagement.

① Random top and bottom image output

(RECEIPT GRID / FRAME / ONE)

The Receipt Camera® allows easy insertion of images that are printed together at the top and bottom through the software settings window.
It offers the freedom of customization, allowing the insertion of logos used in the store, promotional/marketing messages, and more.
You can insert multiple images, up to 15 each for the top and bottom, through sequential or random printing. This functionality enables diverse presentations tailored to various needs such as giveaways, QR codes, coupons, barcode printing, and more.

Random top and bottom image examples

② Customizing UI screens (skin)

(RECEIPT FRAME / ONE)

The Receipt Camera® offers the ability to customize the shooting software UI skin. Users can either choose from pre-loaded themes or create a custom Receipt Camera® by inserting self-designed shooting buttons and background images, allowing for a personalized Receipt Camera® that represents our brand.

8-inch RECEIPT ONE supply case

③ Customizing frame design

(RECEIPT FRAME)

The Receipt Camera® RECEIPT FRAME offers the capability to capture photos with backgrounds. Users can utilize over 30 pre-loaded frames or customize their own frames, allowing for up to 12 custom frames. This setting enables a custom Receipt Camera® configuration perfectly tailored to our brand using personally created frames.
